

METACROP WS 400

Product Data Sheet

Metacrop WS 400 Multifunctional wetting agent and surfactant with extractive emulsifying action for mobilizing crop formation.

TYPICAL PHYSICAL AND CHEMICAL PROPERTIES

Constitution	Mixture of surfactants
Appearance	Powder @ 30 deg C.
Color	White powder
Solubility	Dispersible in Water in all proportions
Compatibility	Compatible with anionic and non-ionic products

Application

This product may be incorporated into formulations on its own or as a mixture with other surfactants. Recommended physical performance test for WP formulations include the listed CIPAC methods: Suspensibility (MT 184) and Wettability (MT 53.3). It is generally applied as a co-surfactant with various surfactants in the manufacturing of WP/SP/WG/SC for agrochemicals pesticides formulations.

Storage

Stable under normal conditions, the product should be stored away from heat and container should be properly capped all the time.

Technical Services

ICI Chemicals provides technical service and maintains a constant programme of research and development. The Group's technologists are available to work with customers in developing formulations to achieve optimal performance and economy. Samples of ICI Chemicals products are available on request.

Technical service and samples are backed up with detailed literature, such as product datasheets and guide recipes.

The information recommendations in the publications are to be the best of our knowledge information and belief accurate at the date of publication. Nothing herein is to be construed as a warrant, express or otherwise. In all cases, it is the responsibility of the user to determine the applicability of such information or the suitability of any product for their own particular purpose. All sales of these products shall subject to ICI's standard conditions of sales. Freedom under Patent, Copyright and Design cannot be assumed.

Shelf Life

24 months
