

## PRICAT™ 9910

### Description

**PRICAT 9910** is an active nickel, silica-supported catalyst. The catalyst contains approximately 22wt% nickel. It is coated with a hardened vegetable fat as protective medium.

### Application

It is used for the hydrogenation of vegetable and animal oils, and performs with high activity and excellent poison resistance. It is also used for full hydrogenation of these oils.

### Properties

- Excellent activity and good resistance to catalyst poisons.
- Optimum selectivity in partial hydrogenation.
- Easy to filter. No filter aid required.
- Good hardening results under various working conditions.
- Rapid distribution of the catalyst in the oil.
- Good re-use properties giving high efficiency of catalyst use.
- Safe and simple handling of the catalyst.
- Suitable for Kosher applications.

### Form

**PRICAT 9910** is delivered as pellets.

### Packaging

In 200 litre metal drums containing 160 kg net.

### Shelf life

**PRICAT 9910** can be kept in closed drums for two years without a noticeable influence on catalyst quality, if stored correctly. (Out of direct sunlight, in a cool place).

---

**PRICAT is a trade mark of the Johnson Matthey Group of Companies**
